Wolf under the Bed

(English Version)

In a hut in the middle of the Tayga sit three lonely and gloomy Finns. Having seen wolf tracks in the snow, they start telling each other stories about injured, sneaky, bewitched and always hungry wolves. Then the action begins... Some of the stories are funny, others are exciting and, as the night wears on, the performance moves at lightning speed with multiple role changes and becomes outrageous and thrilling.

Wolf under the bed is based on twelve stories, written especially by schoolchildren for the company. The stories are accompanied by live music.

Sgaramusch uses minimal costumes and scenery. They engage their audience using only direct language.
